

DCM COPRON

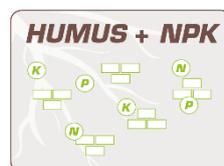

Crumble/pellet

Composition

Organic fertiliser - Compound organic fertiliser NPK 4-3-2

4 %	TOTAL NITROGEN (N)	
	of which 4 % organically-bound nitrogen	
3 %	PHOSPHORUS PENTOXIDE (P ₂ O ₅) soluble in mineral acid	[1,3 % P]
2 %	POTASSIUM OXIDE (K ₂ O) soluble in water	[1,6 % K]
60 %	ORGANIC MATTER	

Suitable for use in organic agri- and horticulture in accordance with Regulation (EU) 2018/848 on organic production and its amendments.

Characteristics

- The ideal farmyard manure replacement
- Organic soil improver composed of dried and concentrated vegetable and animal raw materials NPK 4-3-2
- High organic matter content: improves both the physical and biological fertility of the soil:
- Improved drainage and better air-water balance for good rooting
- Stimulation for the existing soil life
- Soft-acting: may be applied until just before planting or sowing
- For good growth of young plantings, sown lawns or grass rolls
- Long shelf life due to high dry matter content (95%)
- Safe: free from weed seeds and germs

Form

Easy to apply or to spread crumb-form

Packaging

bags of 25 kg – 36 bags/euro-pallet (= 900 kg)

DCM COPRON

NPK 4-3-2

Instructions for use

The exact rate depends on the needs of the crop, the time of application, the nutritional reserve in the soil and the intensity of irrigation. Ask for our specific advice, tailored to your plants and cropping system.

If DCM COPRON is applied before planting or sowing, spread and work into the top layer of the soil (25 cm). When using in an existing planting, irrigate in case of dry weather.

LAWN

- laying out and sods 10 - 25 kg/100 m²

SPORTS TURFS AND GOLFCOURSES

- laying out 15 – 25 kg/100 m²
- maintenance 10 - 20 kg/100

ORNAMENTAL GARDEN

- planting of trees and ornamental shrubs 1 – 2 kg/m³ uitgegraven grond
- planting of perennials and flowers 10 – 20 kg/100 m²
- planting of hedges 2 kg/10 lopende meter
- maintenance 10 – 20 kg/100 m²

TREE NURSERY AND ORNAMENTAL PLANT CULTIVATION

- ornamental shrubs and trees 20 – 30 kg/100 m²
- roses 25 – 30 kg/100 m²
- perennials 10 – 20 kg/100 m²
- conifers 15 – 25 kg/100 m²

VEGETABLES

- leaf vegetables 10 - 15 kg/100 m²
- fruit vegetables, leek , cabbages 15 – 20 kg/100 m²
- other 8 - 15 kg/100 m²

- FRUIT 10 – 20 kg/100 m²

DCM products meet the nutritional values indicated on their packaging and/or the technical data sheets, and are fully traceable. Product advice is intended to be used for informative purposes only and does not imply any commitment or agreement. The instructions for use are based on many years of practical experience and research. Each plant and each cropping system has its own nutritional requirements. The time of application, nutrient reserves in the soil/growing medium and statutory fertilization standards are also important in determining fertiliser application rates. It is advisable (good practice) to always test new product applications on a small scale first. Fertilisers may cause EC to increase and can affect the pH level. All of these factors are essential to consider when using one fertiliser product or when combining different fertilisers. Growing media to which fertiliser products have been added should be used as soon as possible after delivery. DCM accepts no liability for consequential damage caused by the use of its products.
